The Jon Buoy Inflatable Horseshoe is a direct replacement for the traditional horseshoe lifebuoy. The redesigned soft case provides a simple, compact and easy to use product for improved product life, storage, deployment and manoeuvrability. After arming and upon contact with the water the horseshoe automatically inflates, comes with retro-reflective tape and an automatic Aquaspec AQ40 light can be fitted as an option for increased visibility at night.

Glo Lite fabric uses innovative retro-reflective technology that significantly enhances the visibility of the hi-vis fabric, making it highly reflective and increasing perception during dark conditions, thus aiding location, leading to reduced casualty time in the water before recovery for a more positive rescue outcome.

The new Jon Buoy Horseshoe Soft Case is an additional option of a classic product allowing for quicker, more accurate deployment of the horseshoe. The soft case including a versatile mounting bracket, plus internal protection that allows for a 2 year service period and a 5 year warranty.
